About Company

Established in 2000 by Mr. John Dyers, JJ Dyers Construction began as a specialist service provider in solid waste management, waste removal, and the maintenance of civil engineering infrastructure. Over the past two decades, the company has evolved into a highly reputable civil engineering construction firm with a strong track record across the South Africa.

Since 2006, JJ Dyers Construction has focused primarily on delivering civil engineering infrastructure and Pipeline repairs for private housing developments and various departments of the City of Cape Town. Through consistent growth, technical capability, and a commitment to quality, the company has become a trusted contractor for complex municipal and private-sector civil works—including both traditional construction and advanced trenchless engineering solutions.

Today, **JJ Dyers Construction (Pty) Ltd** specialises in:

Earthworks

Pipelines (Water, Sewer & Effluent)

Road Construction & Rehabilitation

Concrete Structures

Municipal Infrastructure

Trenchless Technologies (CIPP, Pipe-Cracking, Slip lining, Patch lining, HDD-related Civils, Pipeline Rehabilitation)

The company operates from its headquarters in Airport City, Western Cape, with project delivery extending throughout the province and beyond.

With a strong emphasis on client engagement, technical excellence, and hands-on project leadership, JJ Dyers Construction consistently delivers exceptional results aligned with client expectations and industry standards.

Strategy & Vision

Vision Statement

JJ Dyers Construction (Pty) Ltd strives to be a leading force in the civil engineering and trenchless construction sectors—building infrastructure that enables community growth, supports sustainable development, and turns our clients' visions into reality.

Mission Statement

We are committed to building long-term partnerships grounded in integrity, performance excellence, value creation, and client satisfaction. Our mission is to consistently meet the evolving needs of our clients through high-quality, innovative, and cost-effective services delivered by a skilled and dedicated workforce.

We maintain rigorous safety protocols to ensure the wellbeing of employees, subcontractors, clients, and the public.

Core Values

Our philosophy is captured in our motto:

“Build the Best. Be the Best.”

This motto reflects the culture that shapes every aspect of our operations. Our values guide strategic decisions, influence daily actions, and uphold a legacy of reliability and excellence:

Safety

Safety is our foremost priority. We maintain rigorous safety protocols to ensure the wellbeing of employees, subcontractors, clients, and the public. Safety is integral to production, quality, and sustainable project delivery.

People

We value our employees, partners, and the communities in which we work. Our people-focused approach strengthens our relationships and fosters long-term success.

Ingenuity

We excel at developing creative, practical solutions for complex engineering challenges—particularly in trenchless rehabilitation, where innovation is essential.

Results

We deliver high-quality projects within budget and on schedule through diligence, transparency, reliability, and strong collaboration with clients and stakeholders.

Success

Our track record, industry reputation, and sustained growth reflect our disciplined approach to project execution and stakeholder confidence.

Business Goals & Objectives

In a rapidly evolving civil engineering environment, our focus remains on continuous improvement, operational efficiency, and long-term sustainability.

Our objectives include:

Delivering the highest quality infrastructure and services, consistently outperforming industry benchmarks.

Growing the company through innovation, technology adoption, and efficient project execution.

Supporting a balanced, mutually beneficial ecosystem for all stakeholders—investors, financiers, clients, contractors, and communities.

Maintaining a company culture centred on passion, professional pride, and excellence in craftsmanship.

Expanding trenchless engineering capabilities to remain competitive in future-fit infrastructure solutions.

Trenchless Engineering Capabilities

JJ Dyers Construction has become a recognised contractor in the trenchless technologies sector, delivering innovative, non-invasive pipeline rehabilitation and installation methods that reduce surface disruption, minimise environmental impact, and accelerate project delivery.

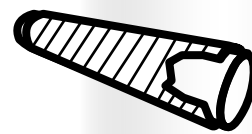

Our experience includes:

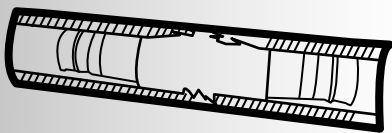

**Pipe-Cracking
(Pipe Bursting)
for water and
sewer mains**

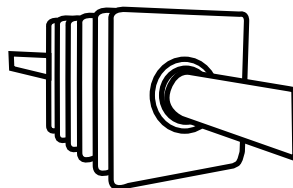

Sliplining

**Cured-In-Place
Pipe (CIPP)**

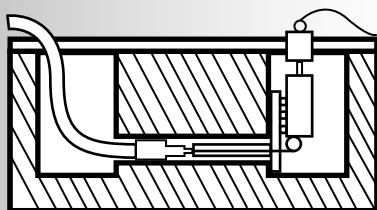

Patch lining

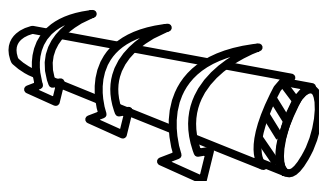

**HDPE installations
associated with
trenchless works**

**Civils for
Horizontal Directional
Drilling (HDD)**

**Trenchless
pipeline
rehabilitation and
replacement**

**Non-disruptive
upgrades of ageing
municipal networks**

These capabilities complement our traditional construction strengths, positioning the company as a comprehensive solutions provider for modern infrastructure challenges.

Current Projects

Our current portfolio includes several flagship and long-term municipal contracts:

Term tender: Sewer repairs and maintenance (131Q)

Term tender: Water and sanitation infrastructure rehabilitation for informal settlements (268Q)

Term tender: Sewer repairs and maintenance (131Q)

Term tender: Water mains, hydrants & valves (49Q)

Term tender: HDPE pipelines – Cape Flats & Atlantis Aquifer Schemes (177Q)

Term tender: Trenchless rehabilitation of water mains (265Q)

Term tender: Emergency water infrastructure repairs (111Q)

Term tender: Water meter replacement (50mm–300mm) and new connections (97Q)

Term tender: PRV and meter chamber installations (216Q)

Term tender: Treated effluent and alternative water source upgrades (276Q)

Term tender: New sewer mains (83Q)

Term tender: Minor stormwater infrastructure works (215Q)

Trenchless methodologies form a significant and growing portion of our ongoing work, demonstrating client confidence in our technical expertise and delivery capability.

BBBEE & Transformation Commitment

JJ Dyers Construction is committed to meaningful transformation within the South African construction industry. Women remain significantly underrepresented in the sector, and our **Women's Empowerment Programme** is designed to cultivate skills, promote leadership, and create real opportunities for female participation across our operations. Our long-term goal is to achieve and maintain **Level 1 BBBEE status** while ensuring that empowerment is authentic and value-adding

HAPPY ENDING 😊

Thank you for taking the time to read the JJ Dyers Construction business profile. We appreciate your interest in our company and the work we do. Should you require any further information or wish to discuss a potential project, we would welcome the opportunity to engage with you.

Get In Touch!

We would love to hear from you. If you have any questions, require additional information or would like to discuss an upcoming project, please get in touch with JJ Dyers Construction. Our team is always available to assist and look forward to the opportunity to work with you.
